

Kinaxis TLO by 4flow - integrate transportation planning into S&OP processes

Bring the power of transportation and load-building optimization to RapidResponse®

The Kinaxis® Transportation Load Optimizer by 4flow (TLO) is an embedded certified RapidResponse® application. It enables Kinaxis customers to integrate constraints from transportation planning into the supply chain earlier and enable S&OP processes.

- 1 Net requirements calculation
 - + **TLO truck load optimization**
 - 2 Plan transportation & create shipments
 - 3 **Optimized** asset creation
-

The TLO unites the unique concurrent planning platform RapidResponse® with 4flow's deep understanding of global supply chain processes and the associated IT infrastructures. The result: a powerful tool to help planners make confident, profitable supply chain decisions.

Early integration of material and transportation planning drives impressive results.

Reduce transportation costs and maximize utilization of assets

Integrate transportation planning with a digital twin

Eliminate volatility and ensure robustness of your supply chain

Improve process efficiency with greater end-to-end transparency and flexibility

Bring the power of transportation optimization to RapidResponse® concurrent planning

Track and reduce carbon emissions for sustainability

The 4flow software product portfolio - from strategic to operational planning horizons

We offer standard products for planning, optimization and visibility of supply chain and transportation networks.

About 4flow

4flow is a leading provider of supply chain consulting, software and fourth-party logistics (4PL) services. With this cross-functional competency, we are able to meet and exceed the highest standards of quality and innovation.

20+

offices in Europe, North America, South America and Asia

900+

team members globally

400+

customers globally

Our expertise - supply chain software

Software for network optimization and fully integrated transportation and container management

Digitization and software

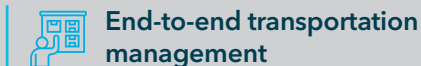

Supply chain strategy

Sustainable supply chain

Network and transportation optimization

End-to-end transportation management
