

# SAP S/4HANA supply chain transformation

A holistic approach to supply chain transformation from a single source

With the end of mainstream maintenance for core Business Suite 7 applications announced for 2027, most businesses are moving to the successor product, SAP S/4HANA. The question is not whether or why SAP customers should switch to S/4HANA, but when and how. Organizations are facing the challenge of transformation as core areas and value creation processes are affected.

With 4flow, you have a partner to help you rethink your supply chain and prepare for future demands through your entire S/4HANA journey - including SAP SCM, SAP EWM and SAP TM.

## SAP S/4HANA transformation - benefits for 4flow customers
