

## 4flow NEVA

# Rapid modeling and analysis of networks in automotive manufacturing

Having an accurate overview of your baseline network is an essential first step to optimizing your supply chain network. Achieving this transparency can be a challenge, due to poor data quality, complicated manual processes, frequent network changes and complex tools.

The software solution **4flow NEVA (Network Exploration, Visualization and Analysis)** provides you with detailed visualizations and analyses of your baseline network in minutes. The results are user-friendly and interactive.

The software empowers you to react quickly to changes in your network and paves the way for the discovery of new optimization opportunities.

### Benefits of 4flow NEVA

4flow NEVA is designed by supply chain professionals with over 20 years of experience in the industry. With the latest IT and sophisticated optimization algorithms, 4flow increases the efficiency, robustness and transparency of our customers' supply chains. We ensure customer satisfaction by achieving real and effective results.

**Easy to use**, intuitive web-based application

**In-app support**, user guides, online help & tutorials

Easy handling of **supply chain & inventory mass data**

Analyze complex networks with **thousands of lanes in minutes**

Ready to **use in less than a day**

Results enable **fast decision making**

## Use cases in automotive manufacturing

### Visualize your network to get the whole picture

Quickly create overviews of the as-is network on interactive world maps, graphs and diagrams

### Track your network's changing footprint

Consider changes in supplier locations and shipment volatility

### Support carrier tender preparations

Prepare strategic tendering for lower rates with flow analyses

### Support strategic sourcing calculations

Review your network for different sourcing options with network snapshots and network cost

### Perform center of gravity analysis

Analyze your network footprint to identify optimal locations for hubs or warehouses

### Find regional clusters to consolidate flows

Analyze and cluster flows to implement milk runs and groupage concepts

### About 4flow

4flow is a leading provider of supply chain consulting, software and fourth-party logistics (4PL) services. With this cross-functional competency, we are able to meet and exceed the highest standards of quality and innovation.

20+

offices in Europe, North America, South America and Asia

1000+

team members globally

400+

customers globally

### Our expertise - supply chain software

Software for network optimization and fully integrated transportation and container management

Digitization and software

Supply chain strategy

Sustainable supply chain

Network and transportation optimization

End-to-end transportation management

### 4flow customers

AGCO INEOS Automotive  
Magna Scania Volvo Cars
